WD^{pro} Window & Door Flashing System

The liquid applied **WD^{pro}** flashing system creates a seamless waterproof barrier around window and door openings as well other penetrations in the building envelope.

Utilizing the BEP Blue Barrier family of products, **WD^{pro}** uses BEP Blue Barrier Joint Filler for bridging building material transitions, joints and seams and the gun applied BEP Blue Barrier Liquid Flashing **or** the roller applied BEP Blue Barrier Flash 'N Wrap RG to create seamless protective pan membranes for weatherproof window and door installations.

WD^{pro} Seamless Protective Pan Membrane

BEP air and moisture protection products are based on STPE * technology with these industry leading features:

The **WD^{pro}** Window & Door Flashing System, can be used as a stand alone system or in conjunction with other air and moisture barrier products.

- Single Stage Application
- Exceptional Adhesion
- Superior Shore Hardness
- Mold Resistant Technology
- Seamless / Permeable Membrane
- Environmentally Friendly
- Dry or Wet Installation

* Silyl-Terminated Polyether

The **WD^{pro}** system is fully code compliant in accordance with AAMA 711, FMA/AAMA 100, FMA/AAMA 200 or FMA/WDMA 250, as well as Miami Dade Code-Section R 703.8 which states that flashing at exterior window and door openings shall extend to the surface of the exterior wall finish or to the water-resistive barrier for subsequent drainage.
